# ATARI 2600

## INSTRUCTION MANUAL

DESIGNED BY AARON NEWCOMB

# THE CHALLENGE

---

## REACH THE FINISH LINE

Nine rounds stand between your octopus and survival. Advance only while the light is green. When it turns red, release the joystick and remain perfectly still.

### YOUR MISSION

Reach the top of the arena before the timer reaches 000. Complete all nine levels to see the final survival screen.

# CONTROLLER

---

JOYSTICK

BUTTON

## CONTROLS

---

- UP Move toward the finish during green lights.
- LEFT Steer left around obstacles.
- RIGHT Steer right around obstacles.
- FIRE Start or restart the game.
- RESET Return to the title screen.

# RED LIGHT, GREEN LIGHT

---

GREEN: MOVE

RED: FREEZE

## WARNING

Any joystick direction during a red light causes immediate elimination. Light changes are randomized, and each new level shortens the reaction time.

# OBSTACLES AND SCORING

---

## LEVELS 2, 4, 6 AND 8

A tree and two boulders block the arena on alternating levels. Their positions change at the start of every round. Steer around them while the light is green.

### SCORING

---

LEVEL CLEAR = 100 POINTS

+ TIMER BONUS = EVERY POINT REMAINING

MAXIMUM SCORE = 9999

# SURVIVAL TIPS

---

- 1 Release the joystick before every red light.
- 2 Plan a clear path before moving around obstacles.
- 3 Short taps provide better control than long holds.
- 4 Move quickly to preserve more timer bonus points.
- 5 Expect faster light changes on later levels.

**CAN YOU SURVIVE ALL NINE LEVELS?**
